ProMass Lateral 3.0 to 4.0 UPG for Xcalibur

Quantity	Part Number:	Product	List Price	Unit Price	Ext. Price
1	PMX-L4-S01-UPG	ProMass Software, Lateral (UPG from 3.0) Lateral upgrade from ProMass STD for Xcalibur 3.0 to 4.0, or from ProMass HR for Xcalibur 3.0 to 4.0.	\$1,000.00	\$1,000.00	\$1,000.00

ProMass allows for automated charge deconvolution of biomolecule mass spectra. The software includes the standard ProMass charge deconvolution algorithm (ZNova) for operation on the Thermo Xcalibur data system. ProMass allows for manual deconvolution via a simple process using single mass spectra, or automated deconvolution of entire LCMS data sets via the Xcalibur sample list. The software includes the capability to automatically match impurities or degradants of biomolecules involving truncation of an input biomolecule sequence. Also, for existing ProMass HR users, the software includes the full suite of Positive Probability Ltd (PPL) MS data processing tools for peak shape, charge, and isotope pattern deconvolution, which can be automated within the ProMass workflow.

NOTE:

*Upgrade pricing is only available to existing users of ProMass STD 3.0 or ProMass HR 3.0. User must have an existing ProMass 3.0 USB license key to obtain upgrade pricing. User must provide a valid ProMass USB license key id at the time of purchase.

*This is a lateral upgrade only and does NOT include a license upgrade from ProMass STD to ProMass HR.

*Software license is for operation on a single computer. Additional licenses must be purchased for operation on multiple computers. The license is not valid for use on a networked server.

*ProMass requires Thermo Xcalibur software to be installed. Xcalibur is available from Thermo Scientific.

*Software and license upgrade will be made available via electronic download. Nothing will be shipped to the end user.

TERMS:

*Payment is due prior to product delivery.

*The total amount does not include sales tax or VAT. Please send a tax-exempt certificate if this is a tax-exempt sale.
