ProMass STD Twin Pak for Xcalibur DOMESTIC

Quantity	Part Number:	Product	List Price	Unit Price	Ext. Price
1	PMX-SW4-S02	ProMass Software, STD Twin Pak	\$13,000.00	\$11,700.00	\$11,700.00

ProMass (version 4.0) for Xcalibur automated deconvolution software twin pak. Includes two licenses with a discount of 10% over single license pricing - perfect for those users who want to process data at their instrument and on a standalone workstation.

ProMass allows for automated charge deconvolution of biomolecule mass spectra. The software includes the standard ProMass charge deconvolution algorithm (ZNova) for operation on the Thermo Xcalibur data system. ProMass allows for manual deconvolution via a simple process using single mass spectra, or automated deconvolution of entire LCMS data sets via the Xcalibur sample list. The software includes the capability to automatically match impurities or degradants of biomolecules involving truncation of an input biomolecule sequence.

NOTE:

*Includes two software licenses for operation on two computers. Licenses do not support operation on a networked server.

*ProMass requires Thermo Xcalibur (available from Thermo Scientific) software to be installed on each workstation where it is desired to run ProMass.

*Software will be made available via electronic download. A USB key device is used to license the software. Two USB license keys will be shipped to the end user.

TERMS:

*Payment is due Net 30 days from invoice date.

*FOB shipping point. Shipping charges are prepaid and added.

*The total amount does not include sales tax or VAT. Please send a tax-exempt certificate if this is a tax-exempt sale.
