ProMass Lateral 2.0 to 3.0 UPG for MassLynx

Quantity	Part Number	Quoted Line Item	Unit Price	Ext. Price
1.00	PML-L3-S01-UPG	ProMass Software, Lateral (UPG from 2.0) Lateral upgrade from ProMass STD for MassLynx 2.0 to 3.0, or from ProMass HR for MassLynx 2.0 to 3.0.	\$1,500.00	\$1,500.00

ProMass allows for automated charge deconvolution of biomolecule mass spectra. The software includes the standard ProMass charge deconvolution algorithm (ZNova) for operation on the Waters MassLynx data system. ProMass allows for manual deconvolution via a simple process using single mass spectra, or automated deconvolution of entire LCMS data sets via the MassLynx sample list. The software includes the capability to automatically match impurities or degradants of biomolecules involving truncation of an input biomolecule sequence. Also, for existing ProMass HR users, the software includes the full suite of Positive Probability Ltd (PPL) MS data processing tools for peak shape, charge, and isotope pattern deconvolution, which can be automated within the ProMass workflow.

NOTE:

*Upgrade pricing is only available to existing users of ProMass STD for MassLynx 2.0 or ProMass HR for MassLynx 2.0. User must have an existing ProMass for MassLynx 2.0 USB license key to obtain upgrade pricing. User must provide a valid ProMass USB license key id at the time of purchase.

*This is a lateral upgrade only and does NOT include a license upgrade from ProMass STD to ProMass HR.

*Software license is for operation on a single computer. Additional licenses must be purchased for operation on multiple computers. The license is not valid for use on a networked server.

*ProMass requires Waters MassLynx and Waters ProMassBridge software to be installed. MassLynx and ProMassBridge are available from Waters Corp.
*Software and license upgrade will be made available via electronic download. Nothing will be shipped to the end user.
